I've been seeing a lot of articles about 2020 being the beginning of a new decade and of making the most of this "fresh start." The question that came to mind was: New year, new you?

Does it really take a new decade to be a new you? Do you want to be a new you? There is no end to the articles online about how to reinvent yourself and make lasting change. Further, how does this relate to your work in the compliance field? Is there really room for reinvention?
