

Designing a Compliance and Governance Model for Today's Hi-Tech Business Environment

Eric Brotten, Director, International & US-Domestic Compliance Programs, Optum. Sarah E. Boswell-Healey, Director, Optum.

September 18, 2019

- The line between tech and traditional companies is blurring, so are the traditional roles-based silos between IT Governance, Privacy and Compliance. Rapid innovation and product development in a global environment requires a cross-functional strategy.
- As a compliance professional, you need to understand how to add value in these team of teams times. Explore differences between traditional waterfall/stagegate product development and current agile methodologies. Learn how to avoid scrum burnout.
- Today's compliance professionals support hi-tech governance. Explore how you can be a valuable part of a governance team and learn practical tips about how to design a program using tools like artifact libraries, playbooks, hazard logs, and RACIs.
